

CONTRACT RECRUITMENT

Druid has the capability to deliver fast deployment of consultants to clients throughout Europe. Our resourcing team continually grows and vets the extensive Druid talent network. Associated consultants are utilised by many of our clients to complement and strengthen existing project resources, where we can assemble individual teams in extremely short timescales.

CLIENT: Small UK Management Consultancy
ROLE: Programme Managers

Druid was asked to provide a programme management capability for the launch of a new online product for a Telecoms business. We were tasked with identifying two Programme Managers - one to run several work streams and one to run the PMO function. We supplied two consultants who had significant Programme Management experience in the telecoms sector. The new product was launched on time and under budget.

CLIENT: US Based Management Consultancy
ROLE: ERP Business Change Consultants

As part of a global transformation project, this US based management consultancy was rolling out a global ERP system for a Hi-Tech client of theirs. The template build was created in the US, however they needed local configuration experts to customise the application throughout Europe to comply with Local payroll and accounting practices. Druid provided multilingual resources in the UK, France, Germany and Spain to deal with these complex customisations. This two year project was completed on time, and the client has consistently returned to Druid for finding European consultants for similar global projects

CLIENT: Large Retail Bank
ROLE: Payments Processing Consultants

Druid was asked to provide consultants directly as a cost-effective alternative to a mainstream consulting organisation. Our client was transforming its payments systems and processes and required interim consultants who were experts in re-designing and re-engineering Retail Banking payments processes. Throughout the lifecycle of this project, Druid provided a range of resource for the project, including business analysts, project managers and technical architects.

CLIENT: Global Management Consultancy
ROLE: Senior Java Programmer

The client, a global management consultancy, required a senior java programmer to join an existing team at a Tier 1 Investment Bank. Druid produced a shortlist of three available candidates to the client within 24 hours of being given the brief. Once selected, the candidate went on to complete a 9 month contract, and was then taken on as permanent employee.
